

SUBHAM KUMAR SINGH

9334802301 – subhamks2114@gmail.com – Bangalore, India – LinkedIn – GitHub

Objective

Engineering student focused on software development, machine learning, backend systems, and DSA, seeking an internship to apply technical skills to real-world problems and scalable applications.

Education

M.S. Ramaiah Institute of Technology B.E. Electronics and Instrumentation Engineering — <i>GPA: 6.0</i>	Oct 2023 – Present <i>Bengaluru, India</i>
Kendriya Vidyalaya Bihta <i>Class XII, Science — 70%</i>	2021 – 2022 <i>Patna, India</i>
Kendriya Vidyalaya Jaisalmer <i>Class X, CBSE — 60%</i>	2019 – 2020 <i>Jaisalmer, India</i>

Experience

Machine Learning Intern Vaidsys Technologies	Jun 2026 – Jul 2026 <i>Bangalore, Karnataka — Remote</i>
--	---

- Built a Loan Approval Prediction system using Python and Scikit-learn on 2,000 loan applications, achieving 90% accuracy and 0.9677 AUC-ROC.
- Developed a Flask REST API and interactive dashboard for real-time loan predictions.

Volunteer, National Service Scheme (NSS) M.S. Ramaiah Institute of Technology	May 2024 – Present
---	--------------------

Projects

AI Network Threat Intelligence Platform

- Developed a Python security platform to detect DDoS, Port Scan, and Brute Force attacks using Random Forest, graph analysis, BFS, DFS, and Dijkstra's algorithm.
- Built FastAPI + SQLite APIs for real-time threat prediction, traffic logging, attacker tracking, and priority-based security alerts.

Stock Price Prediction Using Historical Data & Sentiment Analysis

- Built a hybrid LSTM + FinBERT model combining historical stock prices and financial-news sentiment for next-day price prediction.
- Developed a TensorFlow/Keras prediction pipeline and FastAPI backend with automated sentiment extraction and API-based inference.

High-Performance Delivery Dispatch & Routing System

- Built an asynchronous FastAPI + MongoDB backend using AsyncIO and Beanie to assign delivery orders based on agent location, workload, priority, and ETA.
- Implemented Dijkstra-based traffic-aware routing, event-driven background workers, priority queues, and load simulation supporting 3,000 agents and 10,000 orders.

Technical Skills

Languages: Python, C, SQL

Frameworks & Tools: NumPy, Pandas, scikit-learn, TensorFlow, Keras, Matplotlib, Seaborn, FastAPI, MongoDB

Developer Tools: AWS, Visual Studio Code, Git / GitHub, Jupyter Notebook, Linux Terminal

Soft Skills: Communication, Collaboration, Leadership

Relevant Coursework: Data Structures, Low-Level Design, Database Management Systems, Computer Networks

Achievements

- Whackiest Hackathon 2024 – Top 25 Team, M.S. Ramaiah Institute of Technology
- Kamaize 2026 – Top 4 Position, M.S. Ramaiah Institute of Technology
- 22 Yards of Code 2025 – BitCode — Kaggle Formula One Race Position Prediction Challenge, 2026

Certifications

- Oracle Cloud Infrastructure Data Science Professional Certification — NPTEL, IIT Kharagpur – Cloud Computing — 80+ DSA Problems on LeetCode/GFG
